

## More transparency with kununu

The kununu-rating\* of you as an employer is automatically shown at your job ad, this makes it more relevant to the candidate.

## Full transparency

Improve the quality of your candidates. Show job ad visitors a salary range indicating what they can expect to earn in the given position.

## Present yourself in a professional manner

Create a professional impression by enhancing your text ad with your company logo.

## Candidates can get in touch easily

By showing the responsible HR contact person in your job ad, candidates can get in touch with you via the XING network.

## Personal connection to your company

By displaying the network-connection of the candidate to your company, he/she is able to get a personal and revealing assessment of an acquaintance.

We are searching for a Front End Developer. You will be a technical referent in the frontend technologies field within the company.

As a Senior Front End Developer you will:

- Take an active part in creation and definition of our products, working as the link between the creative and the implementation phases being part of the two.
- Development of reusable UI components for the web and mobile using HTML5 technologies.
- Participate in the analysis and adoption of new technologies to incorporate in the web stack in order to guarantee performance, code quality and maintainability.
- Be a technical referent in the frontend technologies field within the company.

Qualifications and Skills:

- Strong skills on HTML5 related technologies (CSS3, Semantic HTML, etc).
- Demonstrated design and UX sensibilities.
- Experience developing large apps with Angular or another client-side MVC/MV\* framework (Backbone, Ember, knockout, etc) is a plus.
- Senior experience in responsive design (CSS grids)
- Some Experience with server-side coding - PHP and MVC frameworks.
- Experience with A/B testing - (external and internal tools).
- Experience with version control, GIT or other.
- Ability to work both on own initiative and under instruction.

Requirements:

- 4+ years of relevant experience with web Development
- Fluent English
- Currently living in Barcelona, Spain
- Experience developing in an Agile environment. Experience leading Agile development practices would be a big plus.

Benefits:

- Work in a consolidated and rapidly growing company
- Open work environment with young, dynamic and international teams.
- Our Office is located centrally in sunny and friendly Barcelona. The office provides the perfect combination of the dynamic flexibility and rapid growth of a start-up with the security, stability and infrastructure of an industry leader, supported by a strong investor.

ABA English Culture:

Several years ago, the American & British Academy gathered a multinational team of European and American philologists, linguists and computer experts. This group of international experts developed American & British Academy's e-learning proprietary teaching method and technology, with a double goal: in addition to assuring the highest pedagogical content, the ABA English online academy would also provide a system in which English would be fun to learn.

Here at ABA English we believe that studying and learning English is not just about being able to get around and making yourself understood wherever you go. It is not only about understanding business, about sightseeing without problems or studying abroad. It's much more than just being able to fully enjoy your favourite songs and films. It is the feeling of confidence it produces, the confidence of knowing that you are in tune with the modern world.

Want to join us?

If you are interested, please apply!  
The brilliant experience we give to our employees comes from the diversity and experience of our people. A great environment comes from being involved in different cultures. That's why we hire all sorts of talent.
